

SANSKRUTI DAHIPHALE

Computer Engineering undergraduate with technical fundamentals and strong communication skills, backed by experience in student organizations and virtual internships. Seeking placement opportunities to contribute effectively in a team-oriented environment.

EDUCATION

Pimpri Chinchwad College of Engineering (PCCoE), Pune

Aug 2023 - June 2027

- B.Tech in Computer Engineering
- Current CGPA: 8.28/10**
- Minor: Generative AI

Vidya Valley Northpoint Junior College

- HSC (Science) | **Percentage: 87.67%**

P. JOG English Medium School

- SSC | **Percentage: 96.80%**

TECHNICAL SKILLS

- Programming Languages:** C, C++, Python, JavaScript
- Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management System (DBMS), Operating Systems, Computer Networks, Software Engineering
- Web Development:** HTML, CSS, JavaScript, MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Databases:** MySQL, MongoDB
- AI & Machine Learning:** Machine Learning, Generative AI, Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, Data Mining
- Cloud & Tools:** AWS Fundamentals, Git, GitHub, Linux Commands, VS Code, Jupyter Notebook, Google Colab, Power BI
- Design:** Figma, UI/UX Design

PROJECTS

Hospital Digital Queue Management System:

- Developed a full-stack hospital queue management platform to streamline patient appointments and reduce waiting times.
- Implemented secure authentication, role-based access control, and real-time queue tracking.
- Integrated AI-based waiting time prediction with REST APIs and database management.

Traffic Accident Analysis System:

- Developed a Python-based data analytics platform to analyze traffic accident datasets and identify accident patterns.
- Built an interactive dashboard with data visualizations, statistical insights, and trend analysis using Streamlit and Plotly.
- Implemented data preprocessing and pattern discovery techniques using Pandas, Scikit-Learn, and Mlxtend to support data-driven road safety analysis.

Design and Development of an Offline Multimodal Retrieval-Augmented Generation (RAG) System for Smart Automation:

- Developed an offline multimodal RAG system to retrieve, process, and generate context-aware responses for smart automation tasks.

Analyzing Optimization Algorithms for College Timetable Scheduling:

- Studied and compared optimization algorithms to reduce conflicts in timetable generation. Evaluated performance based on faculty availability, classroom allocation, and time constraints.

EXPERIENCE

Deloitte Australia – Data Analytics Job Simulation | Forage

Remote | Dec 2025

- Completed practical tasks in Data Analysis and Forensic Technology using Excel and Tableau.
- Analyzed datasets, created dashboards, and presented business insights through data visualization.

AICTE Eduskills – AI & ML Virtual Internship

Virtual

- Completed assignments on Machine Learning, data preprocessing, feature engineering, and model evaluation.
- Applied Python, NumPy, Pandas, Scikit-learn, and Matplotlib for data analysis and visualization.

AICTE Eduskills – Full Stack Web Development Virtual Internship

Virtual | June 2025

- Completed assignments covering HTML, CSS, JavaScript, backend concepts, and REST APIs.
- Explored database connectivity, SDLC, and full-stack web development concepts.

Leadership & Achievements

President, PCCOE ACM-W Student Chapter (2025–Present)

Outstanding Community Service Award for leadership and community engagement through ACM-W initiatives.

CERTIFICATIONS

- AWS for Everyone – Udemy
- JAVA Masterclass Course – Udemy
- HTML, JavaScript Course - Sololearn
